Securing financial support for projects by selling CO₂ reductions in Switzerland or abroad.

Verifiable CO₂ reductions achieved as part of a project can be sold in Switzerland or abroad to support the project financially.

Funding projects through CO₂ reductions

Strict criteria are applicable to evidence of CO₂ reductions. We will help you monetise your CO₂ reductions through the CO₂ projects and programmes mechanism. We also offer a full consulting service to ensure that your organisation complies with the provisions of the CO₂ Act.

We can validate and verify projects, monitoring concepts and monitoring reports produced as part of the ETS and for target agreements and offsetting projects.

Our services:

- Evaluation of projects and possible financial support for them through the 'offset projects' CO₂ instrument or via the international carbon market
- Evaluation of technologies and possible financial support for them through the CO₂ programme mechanism
- Drafting of relevant documentation, help with registration with the Swiss Federal Office for the Environment or independent CO₂ standard providers
- Regular reporting while your project or programme is under way (monitoring)
- Help with monetising carbon attestations and carbon certificates
- Operation of CO₂ programmes
- Advice on funding possibilities and on carbon tax exemption in relation to the CO₂ Act
