Do you need to bridge vacation or maternity periods?

Are you finding it difficult to find internal occupational safety specialists due to the shortage of skilled workers?

Do you regularly need a person with specialist knowledge, but the overall demand is too low to create your own staff position with all the associated wage and non-wage labor costs?

Rent a Specialist

The specialists at Neosys AG are at your disposal and provide you with flexible, short- or long-term, selective or regular support.

This can be project-related (e.g. vacation replacement, maternity replacement, bridging personnel bottlenecks) or is also possible in a mandate, in which we take over functions directly in the company on a weekly or monthly basis, for example.

Some examples of Rent-a-Specialist projects realized by Neosys AG:

- Long-term support in the area of occupational safety from EHS specialists
- Representation of safety officers, EHS specialists
- Structure of the operational occupational safety system
- Ensuring the ASA reference in companies with special hazards
- Hazardous substance management and chemical safety
- Development and support of management systems

Our specialists are here for you!
