The SDG analysis is a tool we have developed at Neosys AG especially for companies and municipalities. With it, we can help you align your strategic goals with the SDGs, and measure and manage your contribution to their achievement.

Our SDG analysis gives you concrete evidence of your commitment to sustainable development in line with the 2030 Agenda.

SUSTAINABLE DEVELOPMENT GOALS

Importance of the private sector

Beyond the public sector players, private companies are becoming increasingly important in tackling global challenges.

If states do not fulfil their roles, private companies can set an example not only to other private companies but also to public-sector players with their voluntary commitment to sustainable development.

Customers also attach increasing importance to sustainability when choosing a company.

Neosys AG is here to help you:

- We prepare both a rough and detailed analysis of your objectives and principles, and check how they harmonise with the SDGs.
- We establish an action plan based on the results and suggest the areas where improvements can be made.
- We help you implement these proposals and support you with our expertise in the field of sustainability.

Our SDG analysis gives you concrete evidence of your commitment to sustainable development in line with the 2030 Agenda.
