Your municipality's path to greater sustainability.

In close cooperation with your municipality, we offer you efficient solutions for sustainable and legally compliant procurement.

Sustainable public procurement

Public procurement is a high priority in a municipality. Uncertainties about the applicable laws, and the justifications they need to provide to higher-level authorities, are often factors that trouble procurement officers in municipalities.

It is already possible now to integrate sustainability into public procurement, and this offers an excellent opportunity to establish your municipality as a sustainable one.

In close cooperation with your municipality, we offer you efficient solutions for sustainable and legally compliant procurement.

Your benefits

We develop customised solutions for sustainable procurement according to your needs:

- Practical implementation and strategic anchoring in day-to-day business: the procurement tools are adapted to your municipality to give you concrete benefits in your daily routines.
- Promotion of the local economy through the development and use of appropriate criteria for awarding tenders.
- Role modelling and positive image of the municipality through transparent and sustainable procurement.
- No additional organisational effort required.

Our services:

- We help you to ensure your municipality's compliance with the law.
- We help you to establish a sustainability vision and goal analysis based on the existing situation and your needs.
- We advise you on the selection and implementation of suitable instruments for sustainable procurement.
- We help you to implement and integrate these instruments in your municipality's procurement system.
