Do you want an efficient, effortless way to ensure the legal compliance of your business?

The LEXPLUS tool from Swiss company Neosys AG offers a simple, value-for-money solution for checking and recording that your business activities comply with the relevant legislation.

An efficient way to ensure legal compliance

Quote: We clarify your requirements in an initial telephone consultation, then use this information to prepare you a non-binding quote.

Legal analysis: The Neosys legal specialists come and inspect your operations as a basis for drawing up an individual, tailored document outlining the legislation relevant to you. You have personal access to this, giving you full control and the ability to make additions or modifications easily.

Legislation updates: In order to ensure legal compliance, we keep LEXPLUS constantly updated.

LEXPLUS⁺

The online legal database

Management systems such as ISO 14001, 45001, 50001 and 9001 require businesses to be able to prove their legal compliance at all times. With LEXPLUS, your systems and activities are recorded along with indications for your specific legal requirements, resulting in a list containing the relevant legislation.

- Evaluation of legal compliance
- No licence (your own user management)
- Languages: DE/FR/IT
- Multiple sites, corporate divisions or sectors can be managed individually
- Direct allocation of the legal requirements to operational systems
- Regular legislation updates
- Software made in Switzerland
- Data kept in Switzerland
